

# I. Manual

## Introduction

## **Introduction**

The Compliance Examination Manual (Manual) is designed as a reference tool for Compliance examination staff to use when conducting Compliance and Community Reinvestment Act (CRA) examinations and other supervisory activities. The detailed procedures presented in the Manual are not intended to replace sound judgment and discretion on the part of examination staff. Instead, the materials are designed to promote uniformity in the examination process and as a reference tool for examiners.

## **Organization of the Manual**

The Manual is divided into 12 sections as described below and is organized so that information is presented based on regulation rather than process. The Manual incorporates examination policies and procedures in effect as of August 2014. The Manual begins with the risk focused, process oriented examination procedures (Section II) and sample templates to use during the examination (Section III). ### **How to Use the Manual**

The Manual incorporates existing policies and procedures, adding information, job aids, and references that may assist the reader. Each Section begins with a detailed Table of Contents followed by the various rules and regulations related to the topic of the section. For example, the Lending section (V) contains subsections for Truth in Lending, Real Estate Settlement Procedures, and other lending related rules and regulations. Each subtopic includes pertinent background material, examination procedures, references, and job aids to assist the examiner in the examination process. Each rule and

regulation covered in the Sections is included independently in the Manual and can be readily removed, replaced, and updated. In addition, the electronic version is broken into corresponding sections and topics. When new examination policies and procedures are released, the examiner can readily add these to the Manual in the appropriate section. The on-line Manual will be revised to reflect the addition. This same procedure should be followed when any current section or topic is revised or procedures updated. Insert the revision into the Manual and remove any outdated materials.
